# EUROLUX SERIES

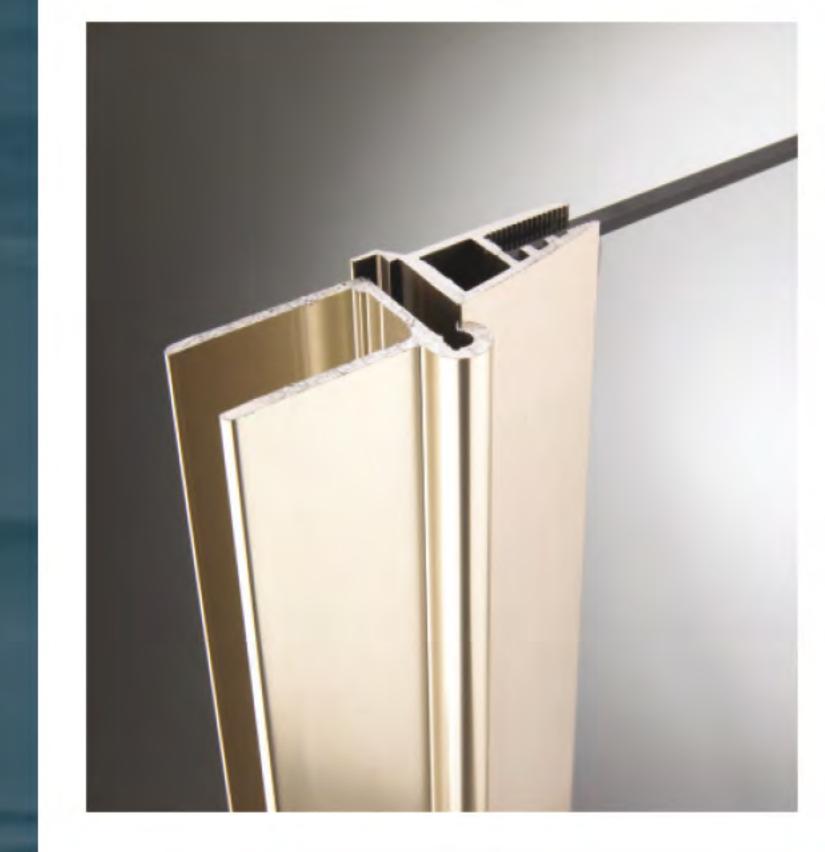

SEMI-FRAMELESS ENCLOSURE

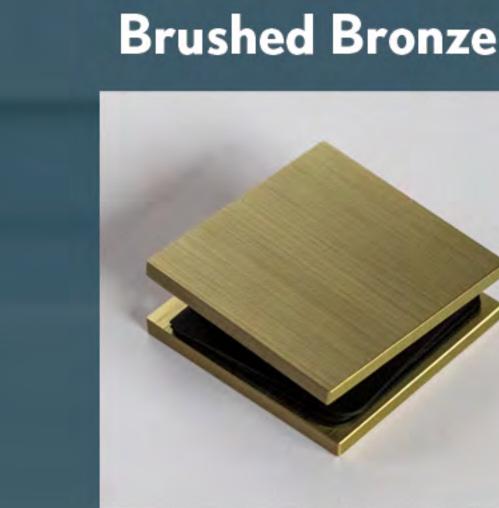

Splendor's EuroLux is the perfect marriage of a 3/8" inline panel and 1/4" door to create a unique frameless look.
Unsightly headers and vertical posts found on standard enclosures are eliminated with the EuroLux series.

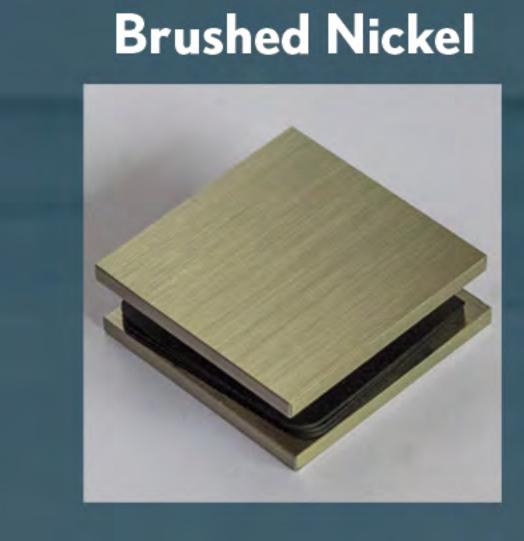

The EuroLux was designed specifically for baths lacking the proper wall support necessary for 3/8" installations including fiberglass inserts.

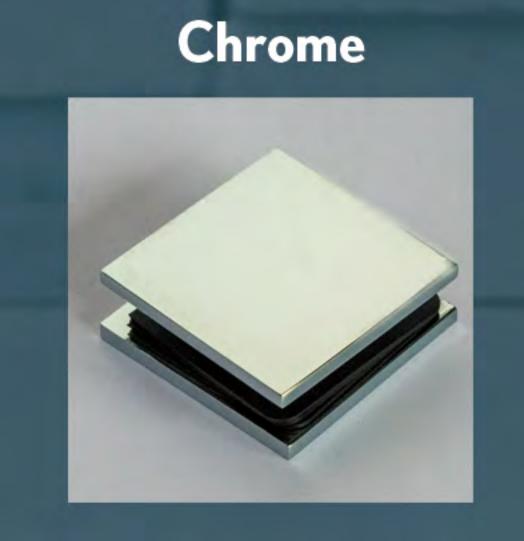

Options include fourteen different glass types and three metal finishes: Matte Black, Brushed Nickel, and Chrome.

## HARDWARE FINISH OPTIONS:

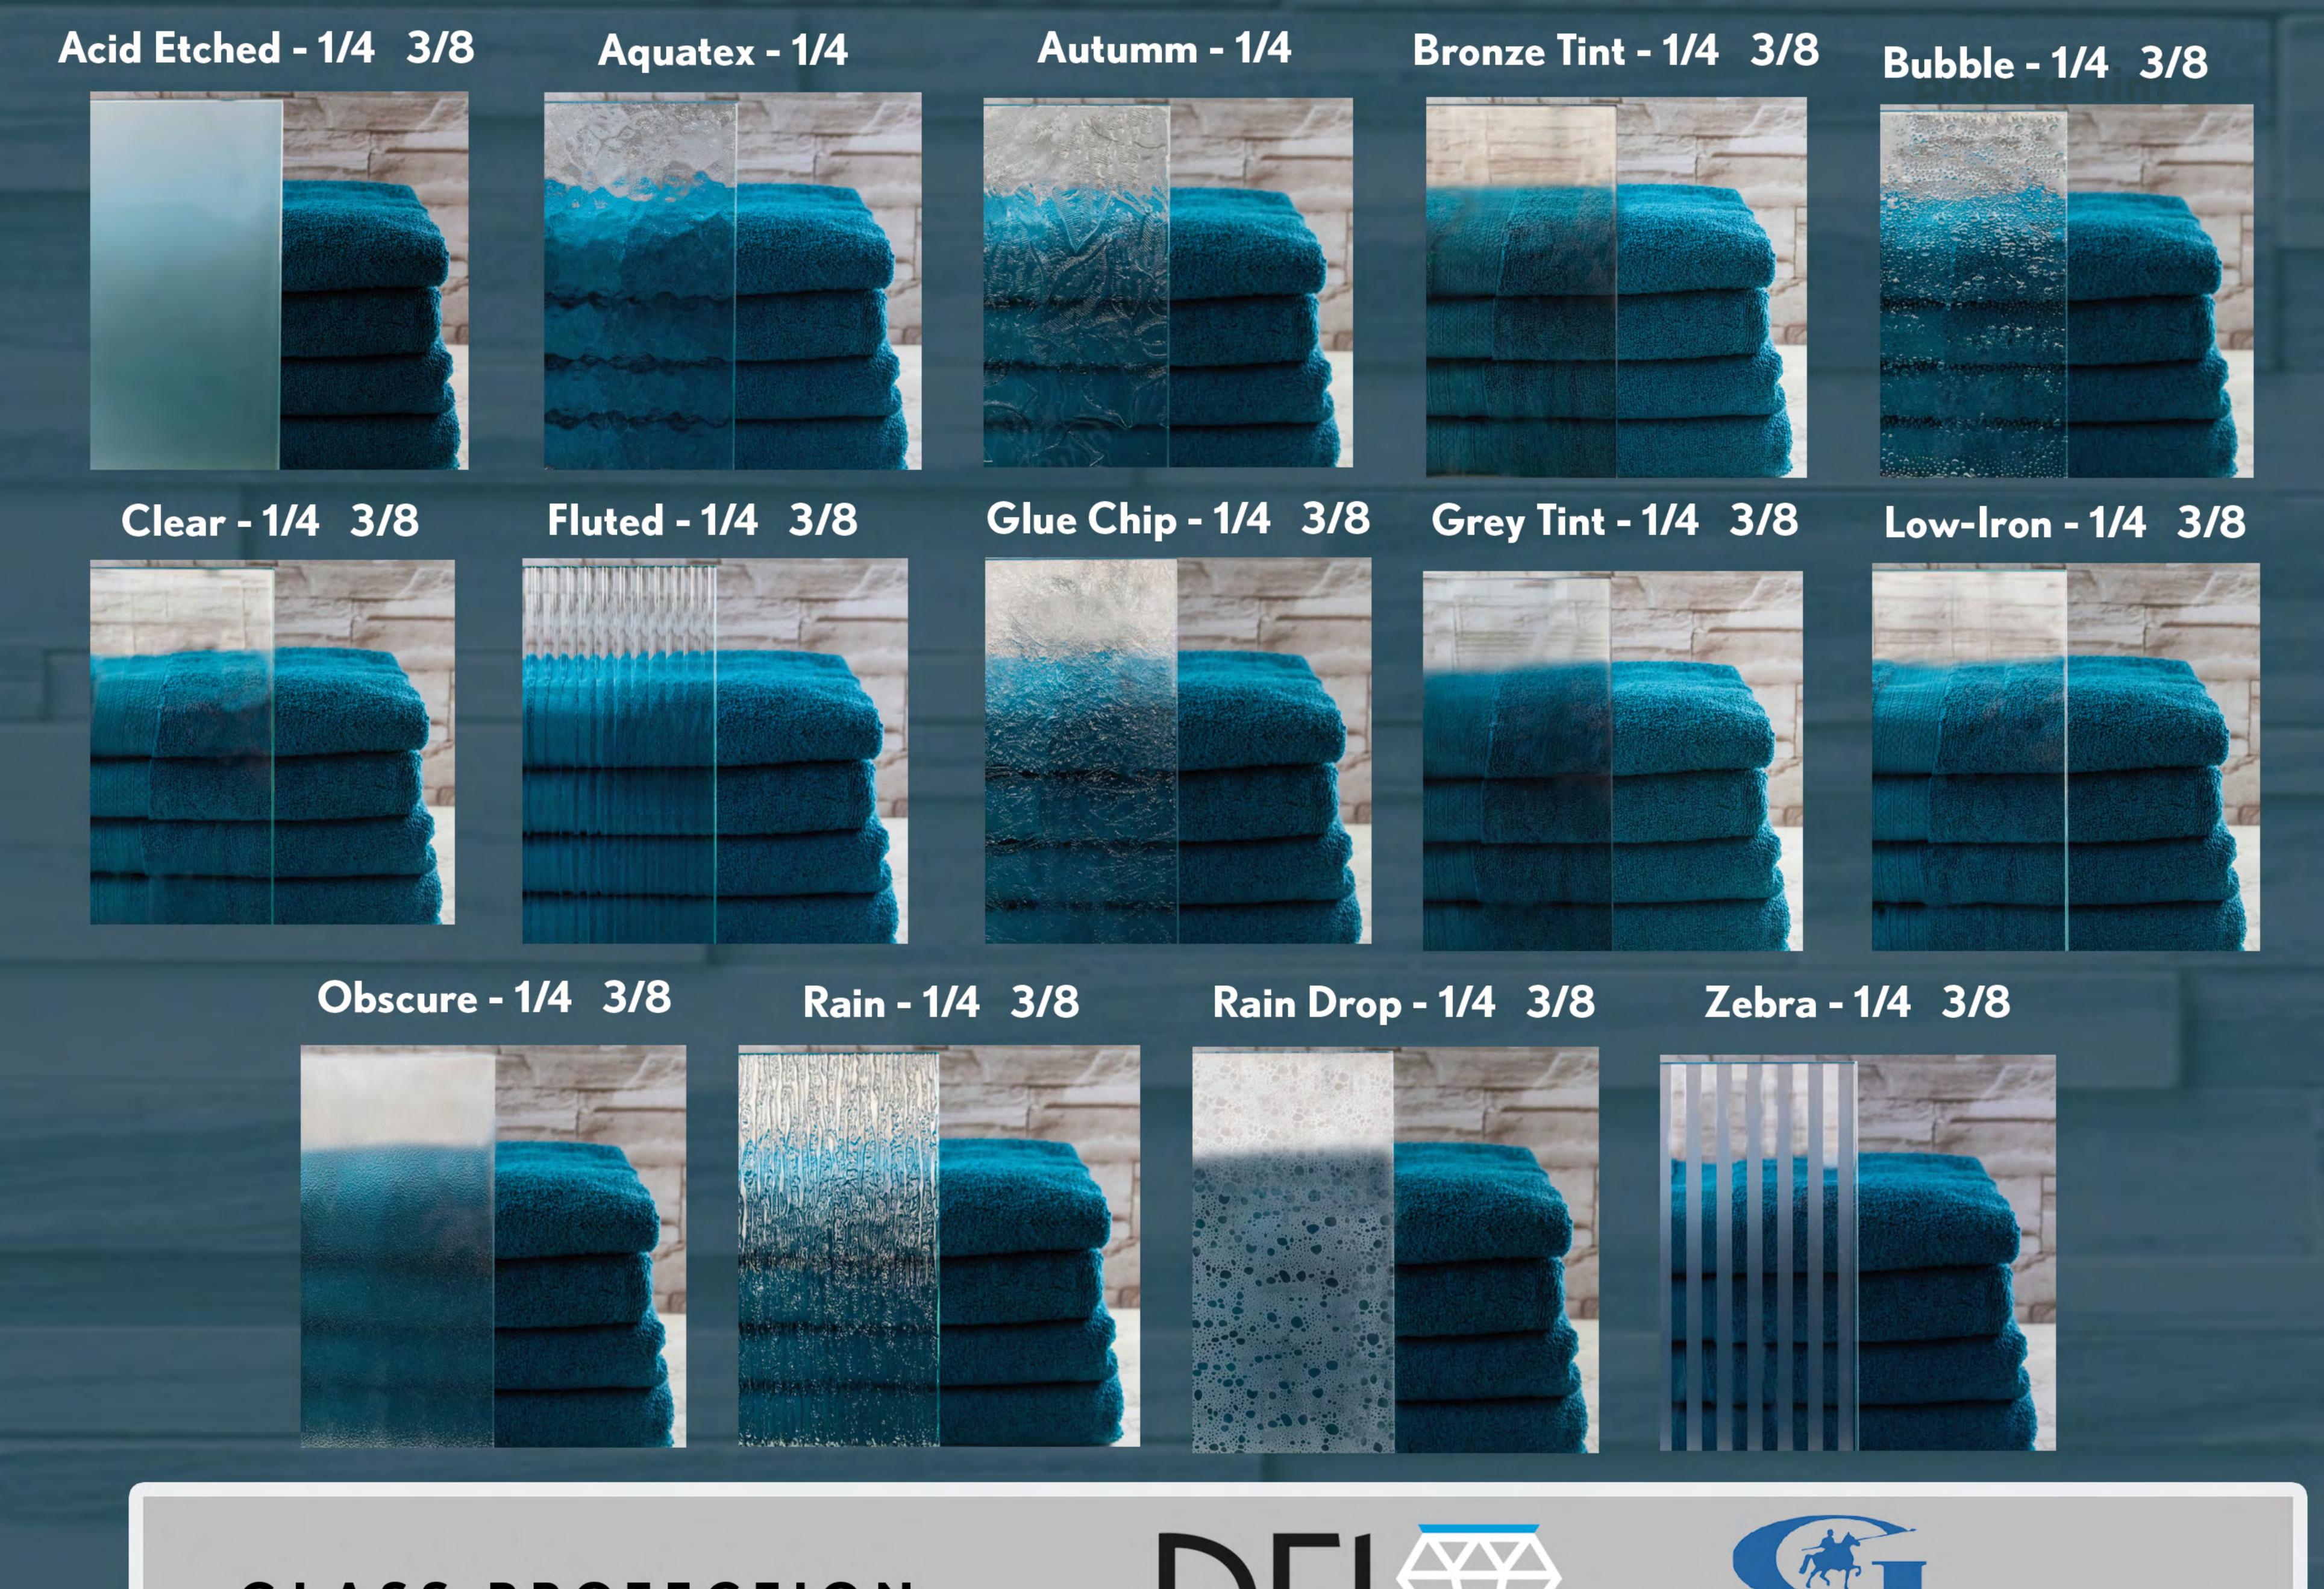

### GLASS OPTIONS:

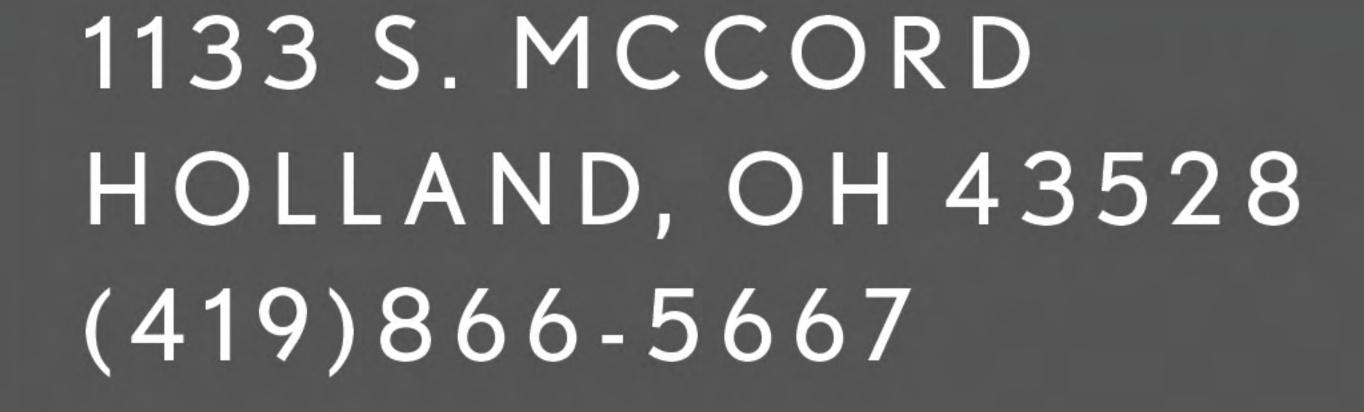

### PREMIER SERIES

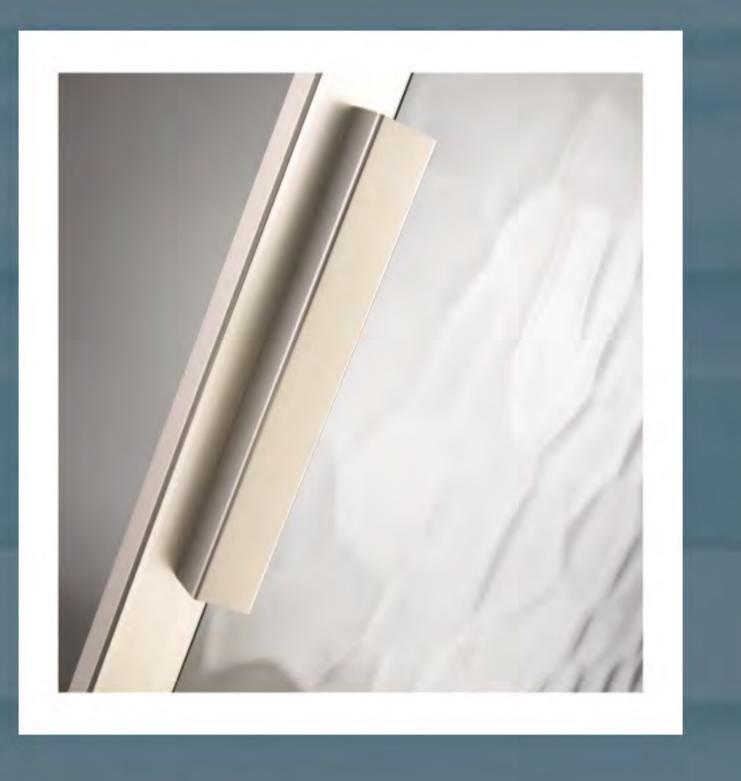

### FULLY FRAMED ENCLOSURE

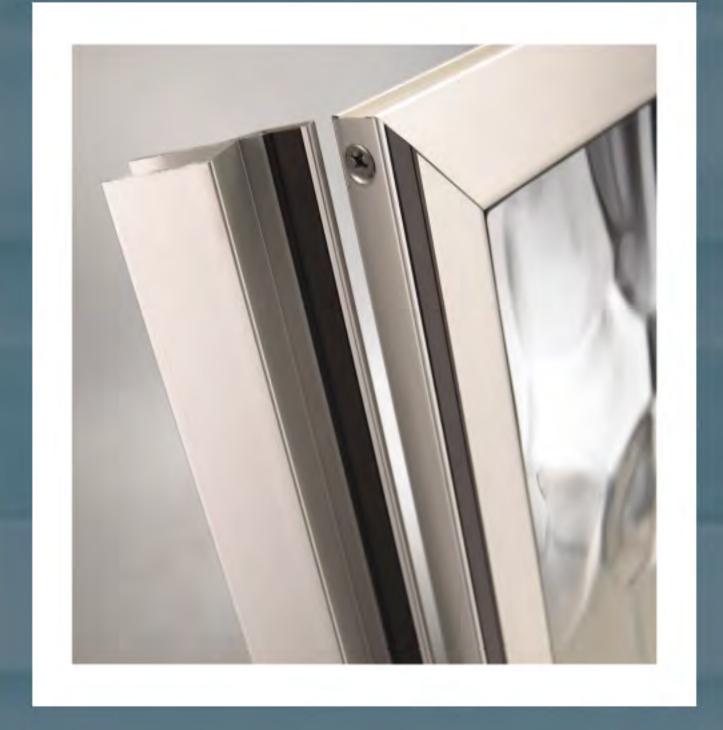

### EUROSERIES

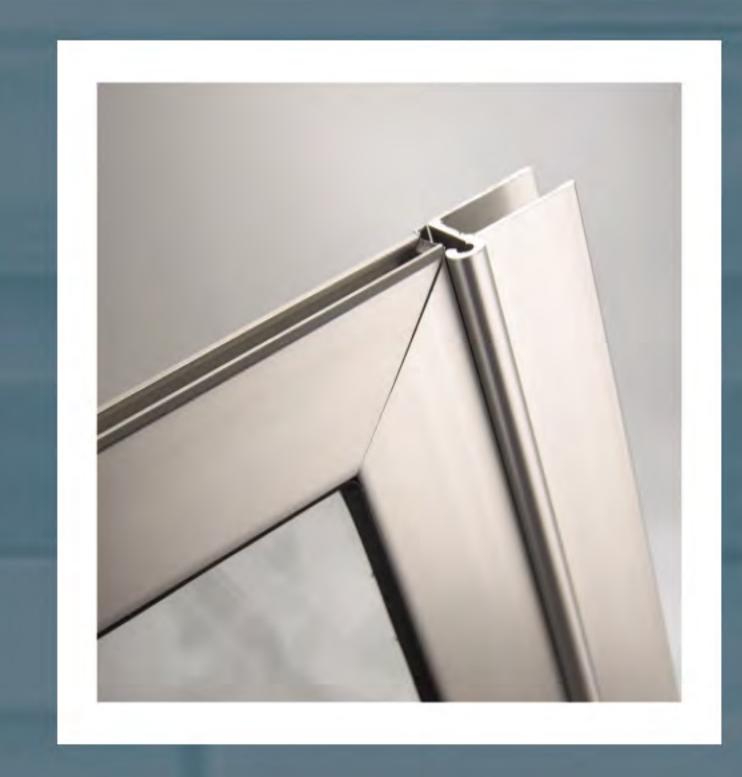

#### SEMI-FRAMELESS ENCLOSURE

## ELITE SLIDER SERIES

SEMI-FRAMELESS ENCLOSURE

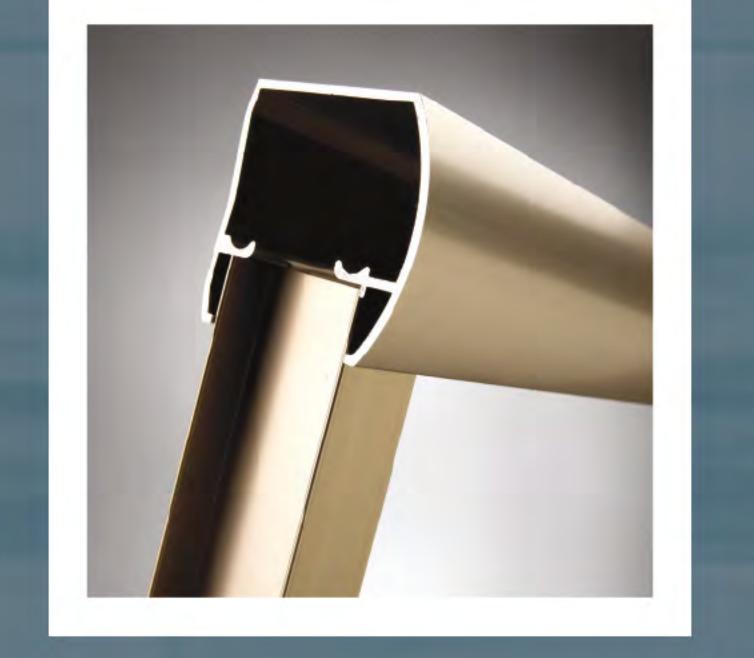

Splendor's Premier Series has a classic but highly functional contemporary look. This fully framed unit provides affordability and multiple design options. The Premier is available in fourteen glass types and four metal finishes; Matte Black, Brushed Nickel, Chrome, and Satin Chrome.

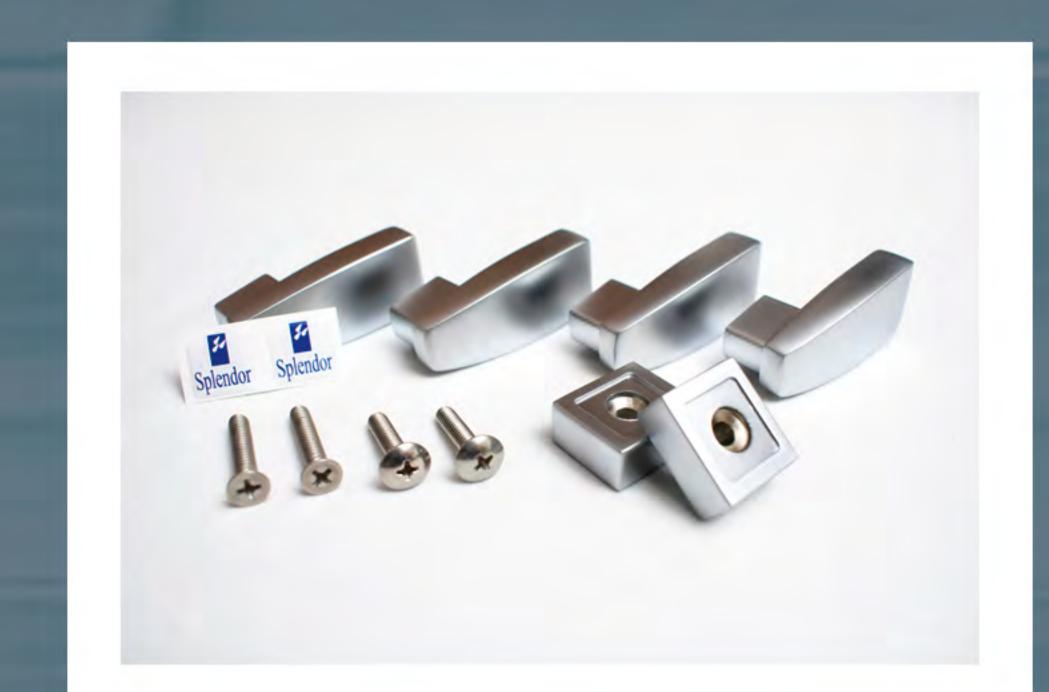

The bottom unit features a reversible header and glass framed rails that give a different look with minimal effort. The curb of this unit has a simple design that is easy to keep clean and fantastic at moving water to the inside of the fixture.

### TOWEL BAR BRACKET OPTIONS

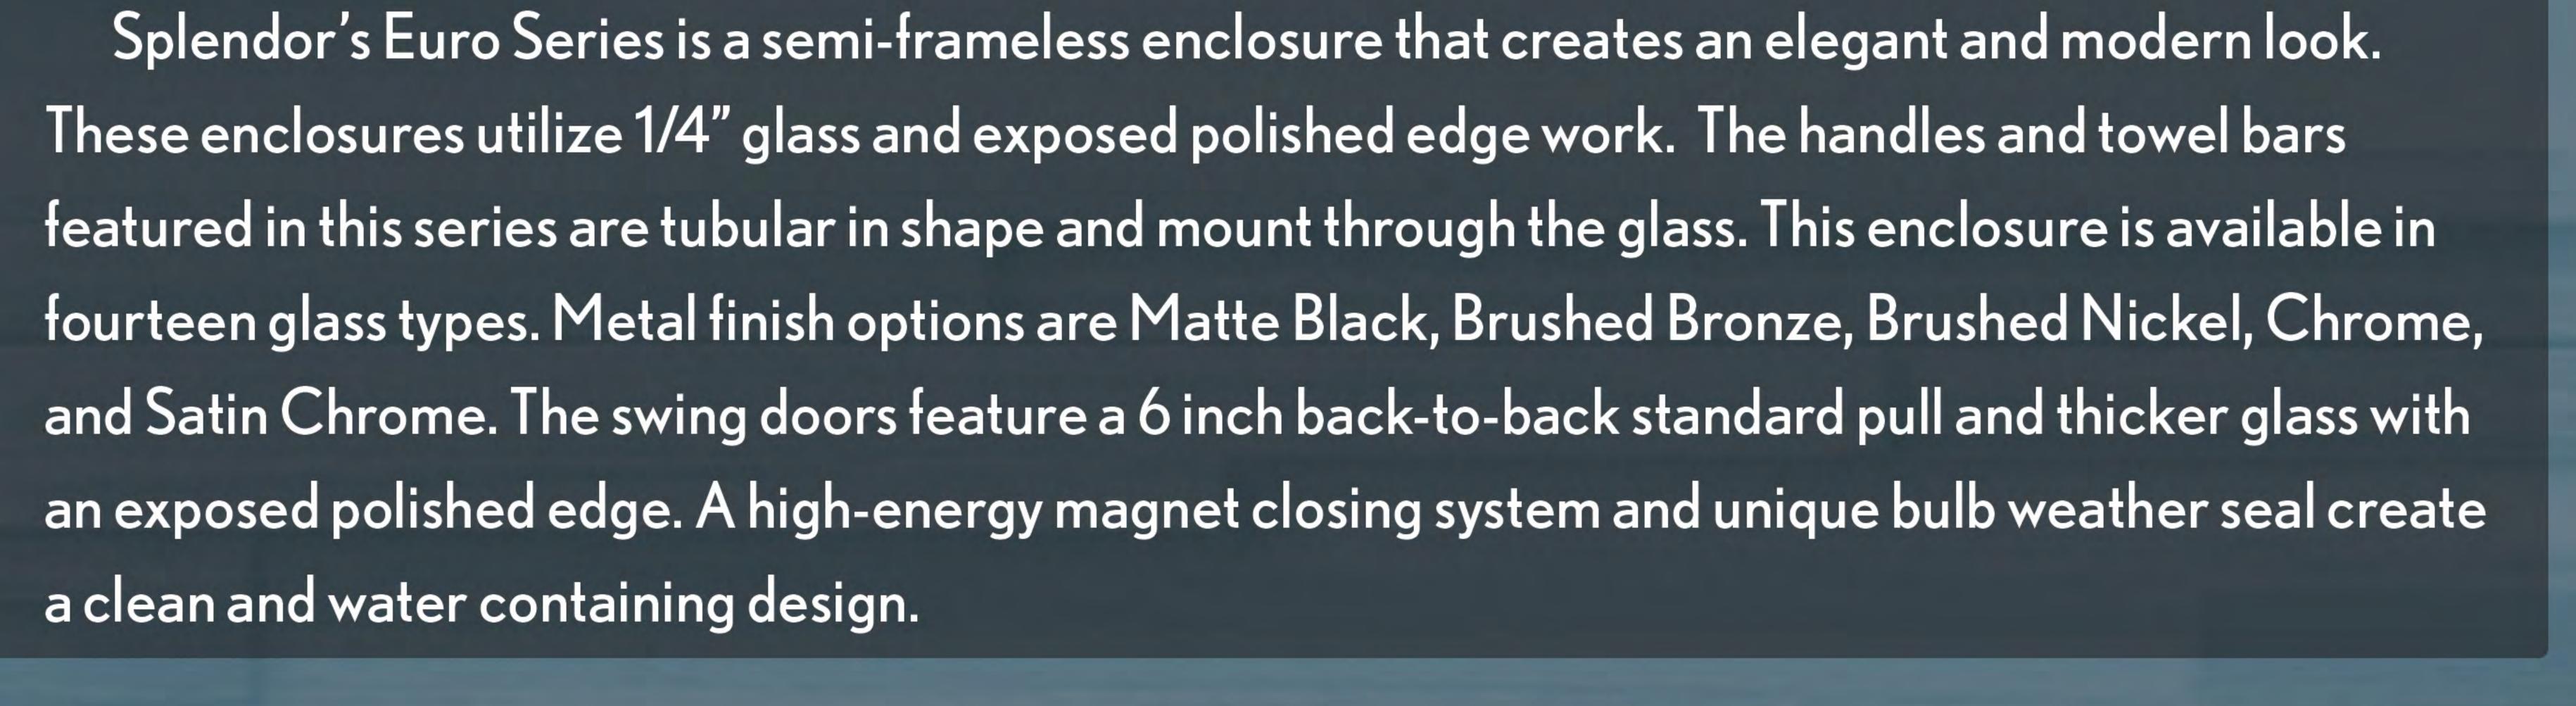

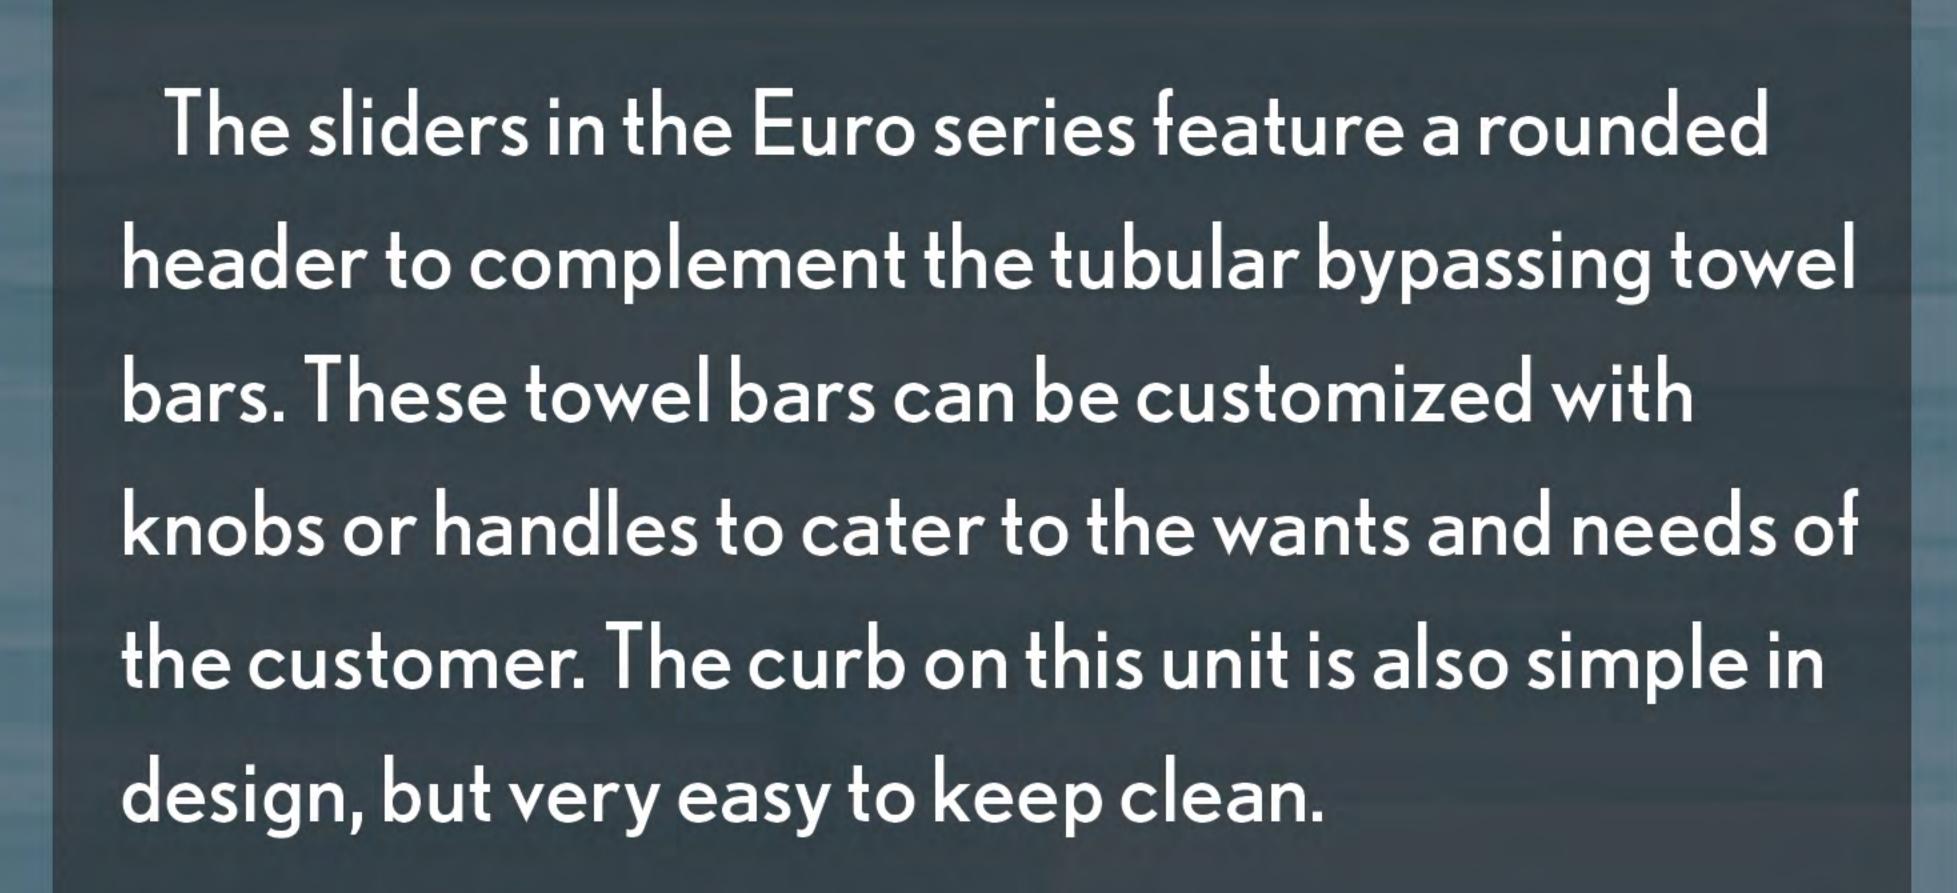

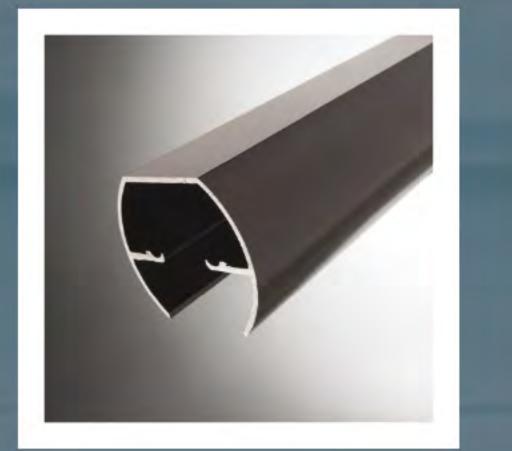

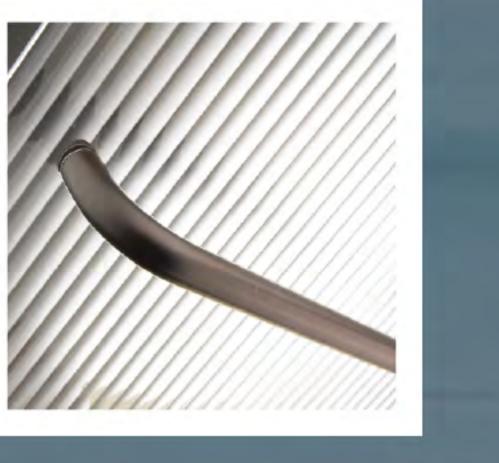

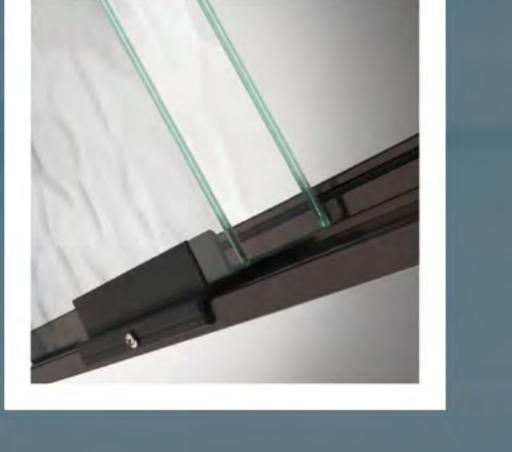

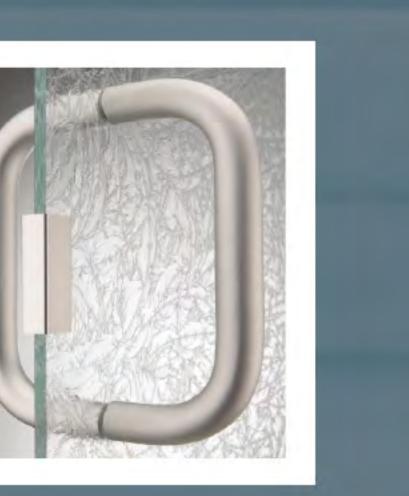

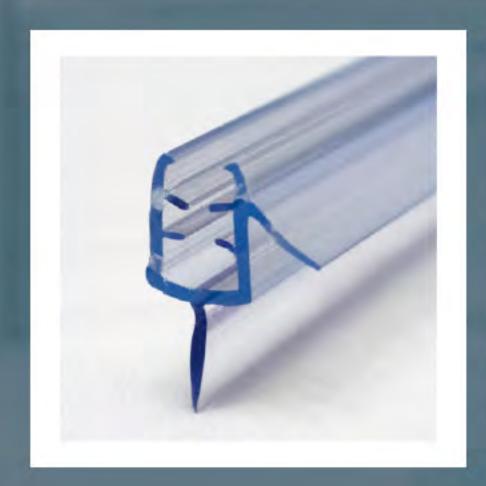

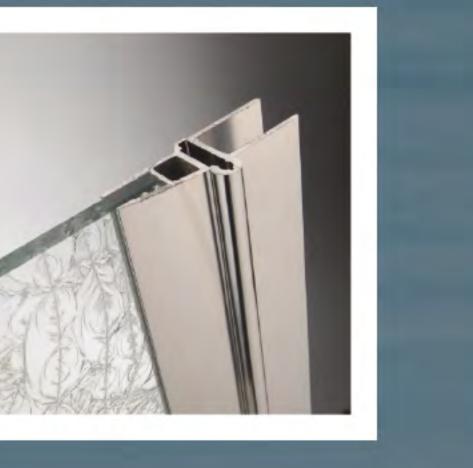

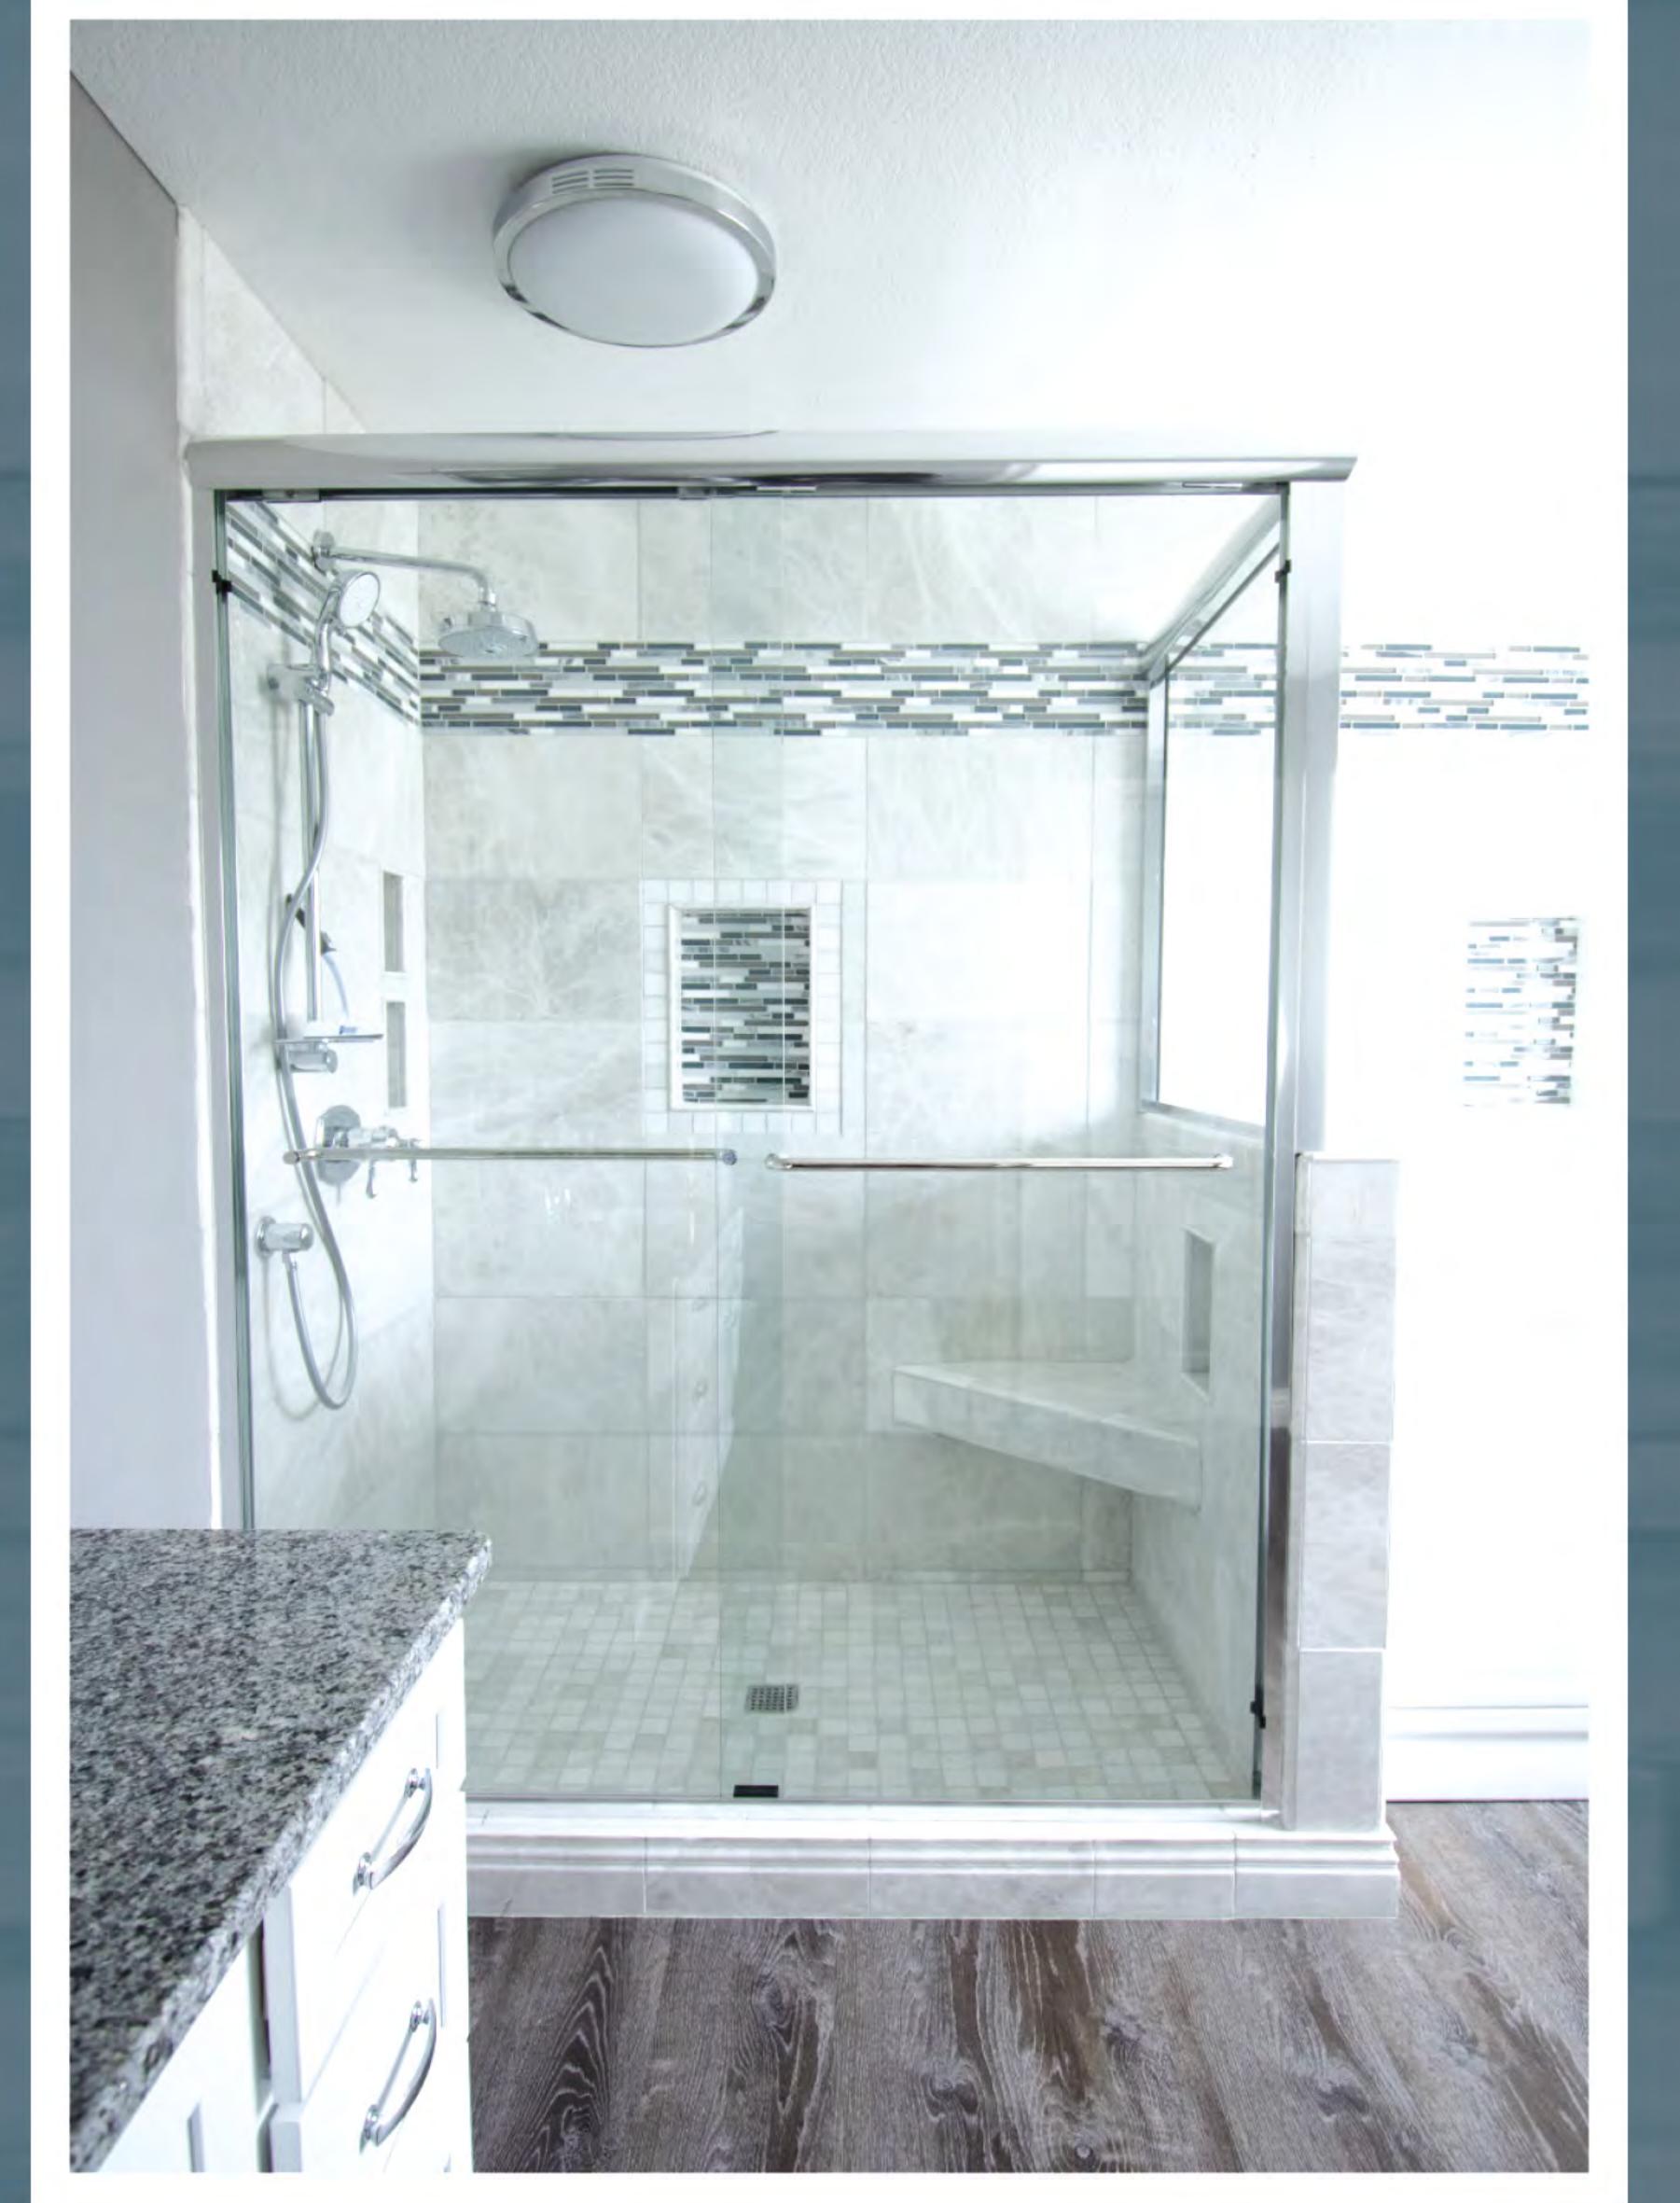

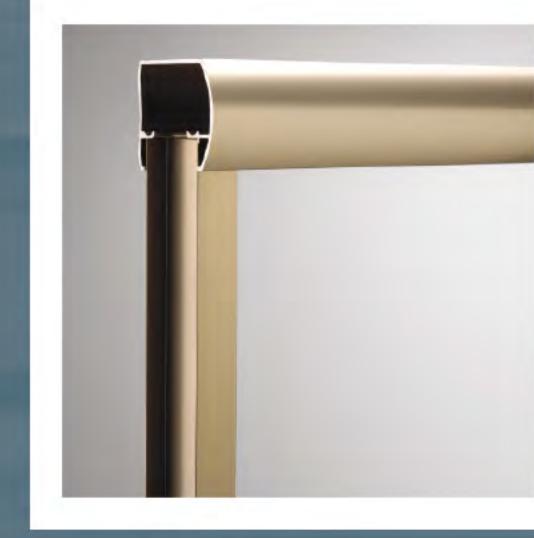

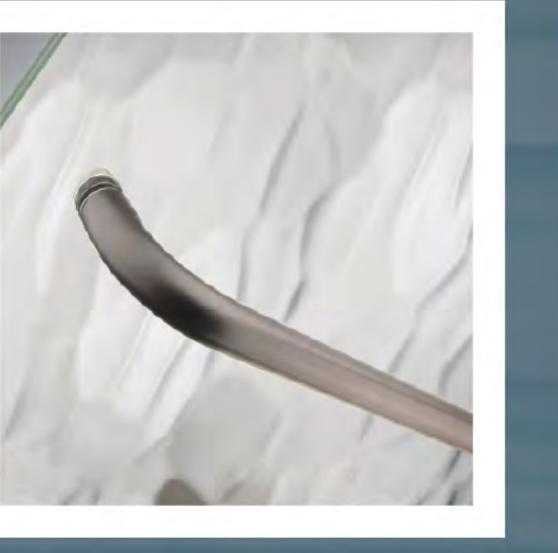

The panels come standard with towel bars, but can be accessorized with the hardware of your choice - from traditional to contemporary design options. This slider is available in fourteen different glass types and five hardware finishes; Chrome, Brushed Nickel, Matte Black, Brushed Bronze, and Brushed Satin Brass.

The Elite Series Sliding door is ideal for the upscale bathroom equipped with a full-sized shower or bath tub, but a limited amount of space.

The upgraded 3/8" glass doors roll smoothly past one another on sturdy bearings that are mounted to a through glass hanger bracket. This creates a high end feel and the ability to create a taller shower enclosure than traditional standard units.
